**NEW Immunization Reporting Process for Students Registering for School for the First Time**

For students registering in an Ontario school for the first time (including kindergarten) who do not have an Ontario Education Number and asked to go to peelregion.ca/immunize/ and follow the information about registering their child for school the first time.

The online reporting process offers an option to upload a photo of the record.

After reporting the immunization information online, a ‘reference number’ will be provided. Write down the reference number.

*Note that the reference number needs to be collected as proof of submission of the immunization information. The reference number does not need to be forwarded to Peel Public Health as the information was sent to Peel Public Health electronically.

**Please Note:** For students who do not have an immunization record, or parents seeking an exemption, or if there are any issues with the online reporting process, please call Peel Public Health at 905-799-7700.
