

Summary of Major Ventilation Infrastructure Improvement Projects

HVAC, BAS, Windows & Portables

Program Year/ Project	School	Outcomes / Benefits
2020-2021		
SCI Funding		
Exhaust Fans	St. Augustine SS	exhaust interior air to exterior and promote fresh air infiltration
	St. Helen ES	exhaust interior air to exterior and promote fresh air infiltration
Heat Pumps	St. Joseph SS	provide air circulation
AHU/ RTU	Metropolitan Andrei	increased fresh air intake and air conditioning
	Philip Pocock SS	increased fresh air intake and air conditioning
	St. Joachim ES	increased fresh air intake and air conditioning
	St. John Bosco ES	increased fresh air intake and air conditioning
	St. John XXIII ES	increased fresh air intake and air conditioning
	St. Mark ES	increased fresh air intake and air conditioning
Unit Ventilators	All Saints ES	fresh air ventilation and filtration
	Bishop Scalabrini ES	fresh air ventilation and filtration
	St. Oscar Romero SS (Blessed Trinity)	fresh air ventilation and filtration
	Our Lady of Fatima ES	fresh air ventilation and filtration
	St. John of the Cross ES	fresh air ventilation and filtration
	St. Jude ES	fresh air ventilation and filtration
	St. Stephen ES	fresh air ventilation and filtration
Window Replacement	Holy Cross	promote fresh air infiltration
	Our Lady of Fatima ES	promote fresh air infiltration
	St. Christopher	promote fresh air infiltration
	St. David of Wales	promote fresh air infiltration
	St. Elizabeth Seton	promote fresh air infiltration
BAS	St. Brigid ES	greater control of fresh air intake and air flow
	St. Elizabeth Seton ES	greater control of fresh air intake and air flow
	St. John the Baptist ES	greater control of fresh air intake and air flow
	Holy Spirit ES	greater control of fresh air intake and air flow
	Our Lady of Providence ES	greater control of fresh air intake and air flow
	St. Jean Brebeuf ES	greater control of fresh air intake and air flow
	St. Stephen ES	greater control of fresh air intake and air flow
	St. Aloysius Gonzaga ES	greater control of fresh air intake and air flow
	St. Paul SS	greater control of fresh air intake and air flow
	Corpus Christi ES	greater control of fresh air intake and air flow
SCI 2020-2021	31 projects completed Aug 2021	
2020-2021		
CVRIS Funding		
Portables	St. Dominic ES	increased fresh air ventilation and filtration, and air conditioning
	St. Edmund ES	increased fresh air ventilation and filtration, and air conditioning
	St. Francis Xavier ES	increased fresh air ventilation and filtration, and air conditioning
	St. John Fisher ES	increased fresh air ventilation and filtration, and air conditioning
	St. Mary (Brampton) ES	increased fresh air ventilation and filtration, and air conditioning
	St. Timothy ES	increased fresh air ventilation and filtration, and air conditioning
Total 2020-2021	37 projects completed Aug 2021	
2020-2021		
CVRIS Funding		
AHU/ RTU	Canadian Martyrs ES	increased fresh air intake and full air conditioning
	Father Clair Tipping ES	increased fresh air intake and full air conditioning
	Our Lady of Good Voyage ES	increased fresh air intake and full air conditioning
	St. Andrew ES	increased fresh air intake and full air conditioning
	St. Basil ES	increased fresh air intake and full air conditioning
	St. Benedict ES	increased fresh air intake and full air conditioning
	St. Brigid ES	increased fresh air intake and full air conditioning
	St. Charles Garnier ES	increased fresh air intake and full air conditioning
	St. Cornelius ES	increased fresh air intake and full air conditioning
	St. Edith Stein ES	increased fresh air intake and full air conditioning
	St. Elizabeth Seton ES	increased fresh air intake and full air conditioning
	St. Joachim ES	increased fresh air intake and full air conditioning
	St. Mary ES	increased fresh air intake and full air conditioning
	St. Monica ES	increased fresh air intake and full air conditioning
	Sts. Peter and Paul ES	increased fresh air intake and full air conditioning
Exhaust Fans	Cardinal Leger SS	exhaust interior air to exterior and promote fresh air infiltration
	Mary Fix ES	exhaust interior air to exterior and promote fresh air infiltration
	Philip Pocock Catholic SS	exhaust interior air to exterior and promote fresh air infiltration
	St. Clare ES	exhaust interior air to exterior and promote fresh air infiltration
	St. Dominic ES	exhaust interior air to exterior and promote fresh air infiltration
	St. John XXIII ES	exhaust interior air to exterior and promote fresh air infiltration
	St. John of the Cross ES	exhaust interior air to exterior and promote fresh air infiltration
	St. Kevin ES	exhaust interior air to exterior and promote fresh air infiltration
CVRIS 2020-2021	23 projects completion Spring 2022	
2021-2022		
SCI Funding		
AHU/RTU	St. Joseph SS	increased fresh air intake and air conditioning
	St. Richard ES	increased fresh air intake and air conditioning
Heat Pumps	St. Francis Xavier SS	provide air circulation
BAS	Bishop Francis Allen ES	greater control of fresh air intake and air flow
	Cardinal Leger SS	greater control of fresh air intake and air flow
	George Vanier ES	greater control of fresh air intake and air flow
	Guardian Angels ES	greater control of fresh air intake and air flow
	Holy Name of Mary SS	greater control of fresh air intake and air flow
	Queen of Heaven ES	greater control of fresh air intake and air flow
	St. Andrew ES	greater control of fresh air intake and air flow
	St. Benedict ES	greater control of fresh air intake and air flow
	St. Catherine of Siena ES	greater control of fresh air intake and air flow
	St. Cornelius ES	greater control of fresh air intake and air flow
	St. John Henry Newman ES	greater control of fresh air intake and air flow
	St. John XXIII ES	greater control of fresh air intake and air flow
	St. Louis ES	greater control of fresh air intake and air flow
Subtotal- SCI 2021-2022	16 Projects - completion Aug 2022	
Total 2021-2022	39 projects	
Total Infrastructure Projects	76 projects (**37 projects 2020-2021/39 projects 2021-2022)
