

SCIENCE EXTRACURRICULARS

S.W.I.S CLUB - STRONG WOMEN IN SCIENCE

The Holy Name of Mary Catholic Secondary School Science Department would like to introduce our newest group of talented young women to our ever growing list of teams and clubs. This inclusive group of young women come from all grades levels and backgrounds with a common mission:

- To promote the love of science within the school through both student and community oriented activities.
- To bring together science and social justice to promote stewardship of our environment and responsible, ethical citizenship.
- To compete in science based competitions at various Ontario universities and regional programs.
- To promote and pursue careers in science thus elevating the role of women in science

Holy Name of Mary Catholic Secondary School is a great choice in schools for young women wishing to pursue careers in science.
